

Large Central Ohio School District Looks into FMX to Eliminate Cumbersome Paperwork and Expedite Requests

WORTHINGTON SCHOOLS

COMPANY OVERVIEW:

WORTHINGTON, OHIO SCHOOL DISTRICT includes 18 schools all together. The district serves approximately 10,000 students in grades K through 12.

FMX is just amazing. It's making my life so much easier because I don't have to contend with all that paperwork anymore. Instead of a separate calendar for every school, I now have a central calendar that tells me who is using what building, documents the equipment they may need, and monitors the quality of the services (maintenance, food, etc.) we are providing.

-PAM STURIANO, COMPTROLLER

CHALLENGES BEFORE FMX:

- Any requests were made via paper and often went through as many as 10 people before fulfillment.
- Staff members were continually complaining because they never knew the status of their requests or how to expedite them.
- Each school kept its own calendar, so there was no central location for handling and monitoring facilities/equipment requests.
- Revenue was lost, because businesses/other educational systems were often not charged for use of facilities and/or equipment.

FMX QUICK WINS:

- **Software was easily customized** to fit specific needs of the district.
- **Installation was simple** and step-by-step instructions quickly trained teachers on how to effectively use it.
- **The work order program means that staff can easily request everything from light bulbs to equipment repairs**, and continuously monitor the status of their requests.
- **FMX personnel are always available** to answer questions and fulfill requests immediately, over the phone.
- **Community requests for use of district facilities are expedited**, and appropriate charges and necessary paperwork—such as liability documentation—are kept in the system to streamline requests and invoicing.
