

Facility Cleaning Management Software

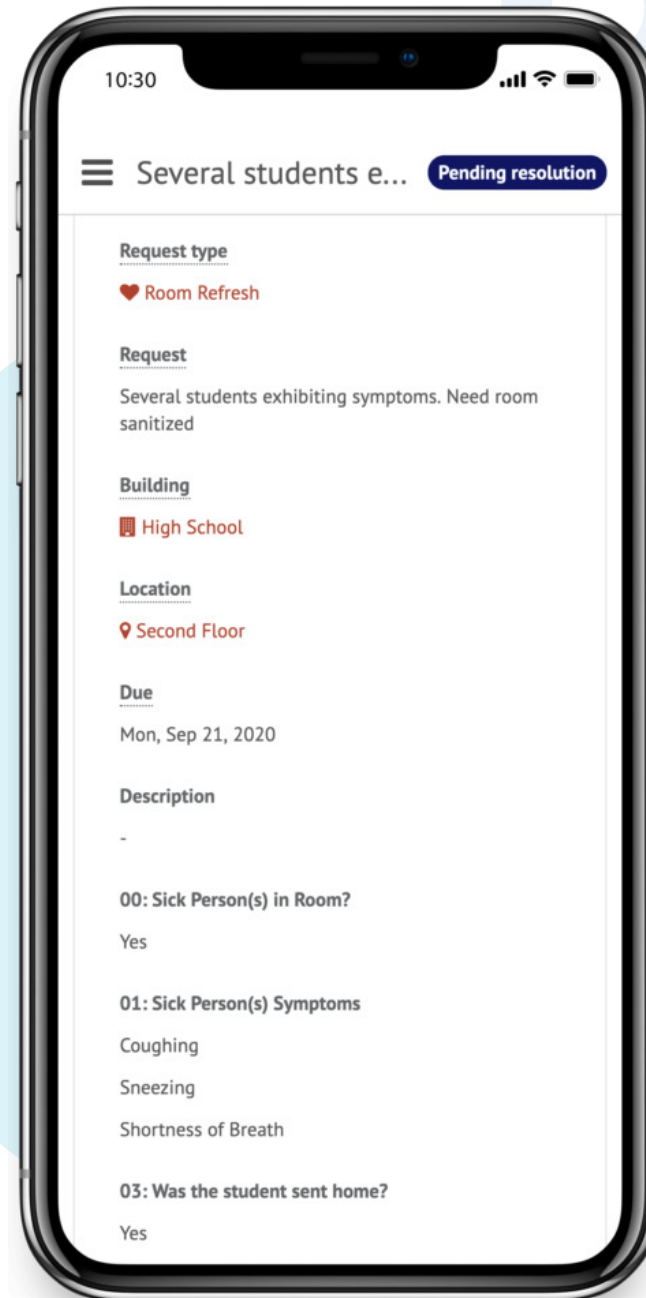

Ensure the health and safety of building occupants by supporting cleaning, sanitization, and other protocols outlined by local and national health officials.

FMX will become the sanitization hub for your facilities. With FMX facility cleaning software, you can create step-by-step instruction sets for disinfecting every part of your building(s) based on guidelines from the CDC and other health officials. FMX also ensures your organization has the proper cleaning and disinfecting supplies it needs by keeping accurate records of inventory used and inventory on hand.

Balance proactive cleaning measures with rapid responses

- Ensure the health and safety of building occupants and visitors.
- Maintain an efficient inventory of cleaning supplies, personal protective equipment (PPE), and other essentials.
- Communicate to all stakeholders what work has been done, what's next, and what needs attention.
- Track resource utilization and costs for budget and cost management purposes.

“Having this new tool within FMX is extremely valuable. My team has access to anything related to the health of our buildings and staff members in FMX, especially COVID-related incidents. We can also track potential issues with bed bugs, lice, typical flu cases, playground injuries and accident reports. Our staff loves FMX as a one-stop shop for anything that relates to safer, cleaner school facilities. The reporting and accountability within FMX gives me great peace of mind that we can showcase our diligent efforts to provide a safe learning environment for all.”

- Alex Prater, Director of Operations and Safety, Wheelersburg Local School District

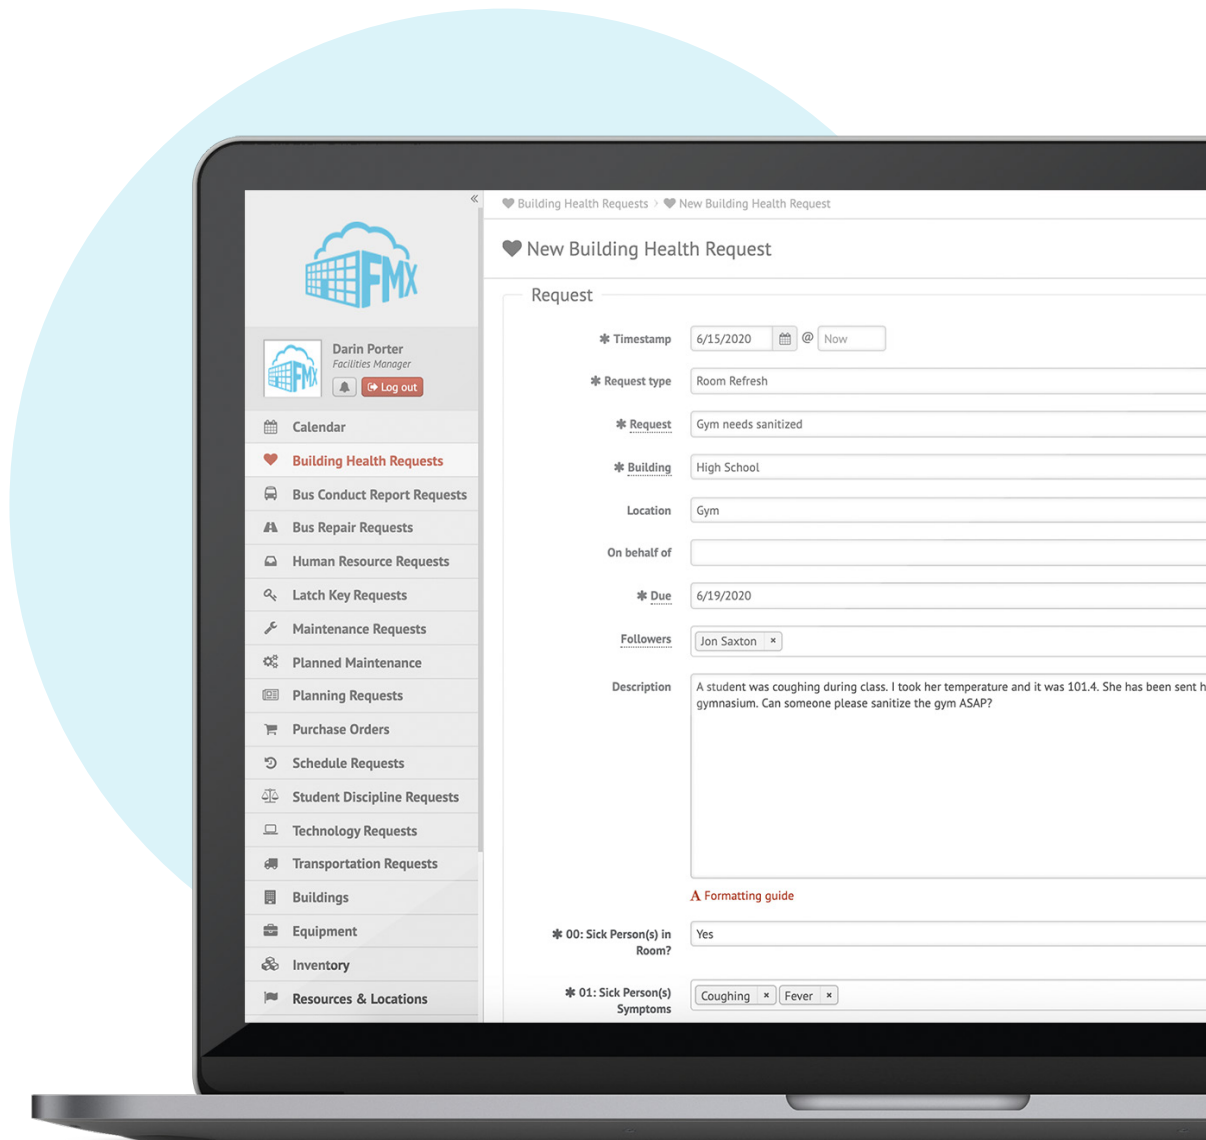

FMX's facility cleaning management capabilities

01. Proactive cleaning and sanitization

Ensure compliance with the Centers for Disease Control and Prevention (CDC) and other health agencies by documenting preventive maintenance actions for your facilities and assets. With step-by-step instruction sets for your team to follow, you will have peace of mind that your team is properly executing cleaning protocols and keeping everyone safe and healthy.

02. Quick response to sanitization issues

FMX gives every team member in the organization a portal to document incidents requiring attention so that facilities and maintenance needs can be captured, organized, and dispatched quickly and effectively.

FMX's facility cleaning management capabilities

03. Inventory and supply management

Keep inventory of cleaning supplies, personal protective equipment (PPE), and other essentials so they are ready when you need them. Avoid over-buying or under-buying by receiving alerts when a cleaning item has reached its reordering point.

04. Effective communication

FMX provides a detailed calendar with robust filtering capabilities so that your team always knows which tasks they are assigned to and when these tasks need to be completed. Leadership can also gain insight to ensure compliance with CDC regulations.

05. Resource utilization and cost tracking

Track and manage costs related to consumed inventory and completed work. This gives you and your team insights into the most expensive areas of your facilities and allows you to maximize budgets.
