

Workplace Safety

Tips to stay safe at work

1 Follow safety trainings

2 Utilize safety equipment

3 Keep your workplace clean and well-maintained

4 Perform annual safety inspections

5 Keep safety records

6 Use machinery and equipment properly

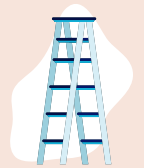

7 Only work when healthy

Dangers to avoid

1 Working without proper fall protection

2 Bypassing respiratory protection when working with toxic dust, fumes, etc.

3 Working while under the influence of drugs or alcohol

4 Improper exposure to chemical or biological hazards

5 Accidental or unplanned machinery startup during repair or maintenance work
